## POTENTIAL ENVIRONMENTAL EFFECTS:

DAP is considered biodegradable and is taken up as a nutrient by vegetation. Large spills can harm or kill vegetation. May release ammonium ions that are toxic to fish. Un-ionized ammonia concentrations above 0.02 mg/l are considered toxic in fresh water. May release phosphates which will result in algae growth, increased turbidity, and depleted oxygen. At extremely high concentrations, this may be hazardous to fish or other marine organisms. Release to watercourses may cause effects downstream. Fish 96 hour LC50, OECD Guidelines 203 (rainbow trout): >86mg/L; Non-toxic to aquatic organisms as defined by USEPA.

## SECTION 4 FIRST AID MEASURES

**FIRST AID PROCEDURES:**

| Eye: | Move victim away from exposure and into fresh air. Flush eyes with plenty of clean water for at least 15 minutes. If symptoms persist, seek medical attention. |
| **Skin:** | Wash contaminated area thoroughly with mild soap and water. If chemical or solution soaks through clothing, remove clothing and wash contaminated skin. If irritation develops and persists after washing, seek medical attention. |
| **Inhaled:** | If respiratory symptoms develop, move victim away from source of exposure and into fresh air. If symptoms persist, seek medical attention. |
| **Ingestion:** | If person is conscious, immediately give water or milk. Do not induce vomiting. Seek medical attention. If person is unconscious, do not give anything by mouth. |

**NOTE TO PHYSICIAN:** If person has been exposed to concentrated decomposition products, treat symptomatically and watch for delayed symptoms of pulmonary edema.

**SECTION 5**

**FIRE FIGHTING MEASURES**

| **FLAMMABLE PROPERTIES:** | Flash Point: Not applicable |
| | OSHA Flammability Class: Not applicable |
| | LEL/UEL: LEL: Not applicable/ UEL: Not applicable |
| | Auto-Ignition Temperature: Not applicable |

**EXTINGUISHING MEDIA:** Use extinguishing agent suitable for type of surrounding fire. Avoid excessive water to minimize runoff. Small fires: Water spray, foam, dry chemical or CO₂ Large fires: Water spray, fog or foam

**PROTECTION OF FIREFIGHTERS:** Positive pressure, self-contained breathing apparatus is required for all firefighting activities involving hazardous materials.

**SECTION 6**

**ACCIDENTAL RELEASE MEASURES**

**RESPONSE TECHNIQUES:** Stay upwind and away from spill (dust hazard). Wear appropriate protective equipment, including respiratory protection, as conditions warrant (see Section 8). Prevent spilled material from entering sewers, storm drains, other unauthorized treatment drainage systems, and natural waterways. Notify appropriate federal, state, and local agencies as may be required (see Section 15). Minimize dust generation. Sweep up and package appropriately for disposal.

**RELEASE NOTES:** If spill could potentially enter any waterway, including intermittent dry creeks, contact the local authorities. If in the US, contact the US COAST GUARD NATIONAL RESPONSE CENTER toll free number 800-424-8802. In case of accident or road spill notify: CHEMTREC in North America at 800-424-9300; from elsewhere, contact CHEMTREC at 703-527-3887 (collect).
## SECTION 7  HANDLING AND STORAGE

**HANDLING:**
The use of appropriate respiratory protection is advised when concentrations exceed any established exposure limits (see Section 8). Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling. Wash contaminated clothing or shoes. Use good personal hygiene practices.

**STORAGE:**
Use and store this material in cool, dry, well-ventilated areas. Store only in approved containers. Keep container(s) tightly closed. Keep away from any incompatible material (see Section 10). Protect container(s) against physical damage. Material may absorb moisture from the air.

## SECTION 8  EXPOSURE CONTROLS / PERSONAL PROTECTION

**ENGINEERING CONTROLS:**
Use process enclosure, general dilution ventilation or local exhaust systems where necessary to maintain airborne dust concentration below the OSHA standards or in accordance with applicable regulations.

**PERSONAL PROTECTIVE EQUIPMENT (PPE):**

<table>
<thead>
<tr>
<th>Part</th>
<th>Recommendation</th>
</tr>

<tbody>
<tr>
<td><strong>Eye/Face:</strong></td>
<td>Approved eye protection to safeguard against potential eye contact, irritation, or injury is recommended.</td>
</tr>
<tr>
<td><strong>Skin:</strong></td>
<td>The use of cloth or leather work gloves is advised to prevent skin contact, possible irritation and absorption.</td>
</tr>
<tr>
<td><strong>Respiratory:</strong></td>
<td>Protection is not required where adequate ventilation conditions exist. Use a dust mask or other appropriate respiratory protection where engineering controls are not feasible or during operations that generate airborne concentrations exceeding the relevant standards.</td>
</tr>
<tr>
<td><strong>Other:</strong></td>
<td>A source of clean water should be available in the work area for flushing eyes and skin.</td>
</tr>
</tbody>
</table>

**GENERAL HYGIENE CONSIDERATIONS:**
Wash thoroughly after handling. Use adequate ventilation.
