SECTION 1: PRODUCT AND COMPANY IDENTIFICATION

Product Name: Limestone
Synonym/s: High Calcium Limestone; Hi-Cal Limestone; Calcium Carbonate; Calcite; Ag Lime
Chemical Name: Calcium Carbonate
Chemical Formula: CaCO₃
Product Use/s: pH adjustment, Mineral Filler, FGT, Construction, Agriculture, Aggregate, Steel
Manufacturer:

SECTION 2: HAZARDS IDENTIFICATION

Emergency Overview: Limestone is an odorless white, grayish-white or tan material that ranges from pebble to a granular powder. Contact can cause irritation to eyes, skin, respiratory system, and gastrointestinal tract. Limestone reacts with acid to form CO₂.

Potential Health Effects:
- **Eyes:** Contact can cause irritation of eyes.
- **Skin:** Contact can cause mild irritation of skin.
- **Ingestion:** This product can cause mild irritation of gastrointestinal tract if swallowed.
- **Inhalation:** This product can cause mild irritation of the respiratory system. Long-term exposure may cause permanent damage. Limestone is not listed by MSHA, OSHA, or IARC as a carcinogen. However, this product may contain trace amounts of crystalline silica in the form of quartz or crystobalite, which has been classified by IARC as a Group I carcinogen to humans when inhaled. Inhalation of silica can also cause a chronic lung disorder, silicosis.

Potential Environmental Effects: This material is alkaline and if released into water or moist soil will cause an increase in pH.

SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

(Crystalline Silica is reported as total silica and not just the respirable fraction)

SECTION 4: FIRST AID MEASURES

**Eyes:** Immediately flush eyes with generous amounts of water or eye wash solution if water is unavailable. Pull back eyelid while flushing to ensure that all limestone dust has been washed out. Seek medical attention promptly if the initial flushing of the eyes does not remove the irritant. Do not rub eyes.

**Skin:** Brush off or remove as much dry limestone as possible. Wash exposed area with large amounts of water. If burned seriously or if irritation persists, seek medical attention promptly.

**Inhalation:** Move victim to fresh air. Seek medical attention. If breathing has stopped, give artificial respiration.
Material Safety Data Sheet
Limestone

Ingestion: Do not induce vomiting. Seek medical attention immediately. Never give anything by mouth unless instructed to do so by medical personnel.

Medical Conditions Aggravated by Exposure: Contact may aggravate disorders of the eyes, skin, gastrointestinal tract, and respiratory system.

SECTION 5: FIREFIGHTING MEASURES

Fire Hazards: Limestone is not combustible or flammable. This product is not considered to be an explosion hazard, although reaction with incompatible materials, such as acids, may rupture containers.

Suitable Extinguishing Media: Use extinguishing media appropriate for surrounding fire.

Fire Fighting Instructions: Keep personnel away from and upwind of fire. Avoid skin contact or inhalation of dust. Wear full fire-fighting turn-out gear (full Bunker gear), and respiratory protection (SCBA).

Hazardous Combustion Products: Not applicable

SECTION 6: ACCIDENTAL RELEASE MEASURES

Spill / Leak Procedures: Use proper protective equipment. Keep away from acids and other incompatible material.

Small Spills: Use dry methods to collect spilled materials. Avoid generating dust. Do not clean up with compressed air. Store collected materials in dry, sealed plastic or non-aluminum metal containers. Residue on surfaces may be water washed.

Large Spills: Use dry methods to collect spilled materials. Evacuate area downwind of clean-up operations to minimize dust exposure. Store spilled materials in dry, sealed plastic or non-aluminum metal containers.

Containment: Minimize dust generation and prevent bulk release to sewers or waterways.

Clean-up: Residual amounts of material can be flushed with large amounts of water. Equipment can be washed with either a mild vinegar and water solution, or detergent and water.

SECTION 7: HANDLING AND STORAGE

Handling: Keep in tightly closed plastic or non-aluminum metal containers. Protect containers from physical damage. Avoid direct skin contact with the material. Avoid breathing any dust.

Storage: Store in a cool, dry, and well-ventilated location. Do not store near acids or other incompatible materials. Keep away from moisture. Do not store or ship in aluminum containers.

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

<table>
<thead>
<tr>
<th>Ingredient</th>
<th>OSHA PEL, TWA 8/40h (mg/m³)</th>
<th>ACGIH TLV, TWA 8/40h (mg/m³)</th>
<th>NIOSH REL, TWA 8/40h (mg/m³)</th>
<th>NIOSH IDLH (mg/m³)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Calcium Carbonate</td>
<td>15 (total dust) 5 (respirable)</td>
<td>10 10 (total dust) 5 (respirable)</td>

</tr>
<tr>
<td>Crystalline Silica</td>
<td>10/(SiO2% + 2) (respirable)</td>
<td>0.025 0.05 (respirable)</td>
<td>50</td>
<td></td>
</tr>
</tbody>
</table>

Engineering Controls: Provide ventilation adequate to maintain PELs.

Respiratory Protection: Use NIOSH/MSHA approved respirators if airborne concentration exceeds PELs.

Skin Protection: Use appropriate gloves and footwear to prevent skin contact and the potential for irritation.
Clothing should fully cover arms and legs.

Eye Protection: Use safety glasses with side shields or safety goggles.

Other: Eye wash fountain/stations and emergency showers should be available.

**SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES**

<table>

<td>Evaporation Rate: n/a</td>
</tr>
</tbody>
</table>

**SECTION 10: STABILITY AND REACTIVITY**

Stability: Chemically stable, but reacts vigorously with acids to form CO₂. Ignites on contact with Fluorine.

Hazardous Decomposition/Products: Limestone decomposes at 950°C / 1742°F to produce calcium oxide and CO₂.

Hazardous Polymerization: Does not occur

Incompatibility/Conditions to Avoid: Limestone should not be mixed or stored with the following materials, due to the potential for vigorous reaction and release of heat:

<table>
<thead>
<tr>
<th>Fluorine</th>
<th>Ammonium salts</th>

**SECTION 11: TOXICOLOGICAL INFORMATION**

An LD₅₀ of 6450mg/kg (Rat, oral) has been identified for this product. Limestone is not listed by MSHA, OSHA, or IARC as a carcinogen, but this product may contain trace amounts of crystalline silica, which has been classified by IARC as carcinogenic to humans when inhaled in the form of quartz or cristobalite.

**SECTION 12: ECOLOGICAL INFORMATION**

Ecotoxicity: Because of the elevated pH of this product, it might be expected to produce some ecotoxicity upon exposure to certain aquatic organisms and aquatic systems in high concentrations.

Environmental Fate: This material shows no bioaccumulation effect or food chain concentration toxicity.

**SECTION 13: DISPOSAL CONSIDERATIONS**

Dispose of in accordance with all applicable federal, state, and local environmental regulations. If this product as supplied, and unmixed, becomes a waste, it will not meet the criteria of a hazardous waste as defined under the U.S. Resource Conservation and Recovery Act (RCRA).

**SECTION 14: TRANSPORTATION INFORMATION**

Limestone is not classified as a hazardous material by US DOT and is not regulated by the
Transportation of Dangerous Goods (TDG) when shipped by any mode of transport.

SECTION 15: REGULATORY INFORMATION

U.S. EPA Regulations:
- RCRA Hazardous Waste Number (40 CFR 261.33): not listed
- RCRA Hazardous Waste Classification (40 CFR 261): not classified
- CERCLA Hazardous Substance (40 CFR 302.4) unlisted specific per RCRA, Sec. 3001;
  CWA, Sec. 311(b)(4); CWA, Sec. 307(a), CAA, Sec. 112
- CERCLA Reportable Quantity (RQ), not listed
- SARA 311/312 Codes: not listed
- SARA Toxic Chemical (40 CFR 372.65): not listed
- SARA EHS (Extremely Hazardous Substance) (40 CFR 355): not listed, Threshold
  Planning Quantity (TPQ): not listed

All chemical ingredients are listed on the US EPA TSCA Inventory List.

OSHA/MSHA Regulations:
- Air Contaminant (29 CFR 1910.1000, Table Z-1, Z-1-A): 5mg/M^3 TWA-8
- MSHA: not listed
- OSHA Specifically Regulated Substance (29 CFR 1910): not listed

State Regulations:
- Consult state and local authorities for guidance. Components found in this product may
  contain trace amounts of inherent naturally occurring elements (such as, but not limited to
  arsenic and cadmium) that may be regulated under California Proposition 65 and other
  States regulations.

Canada:
- WHMIS Classification: "D2A" Materials Causing Other Toxic Effects
- Canada NDSL: Listed
